

Success Story of Odisha Millets Mission Lanjigarh block - Kalahandi District

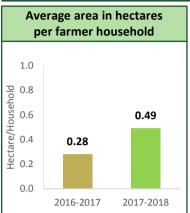

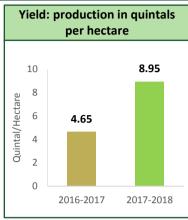

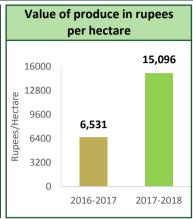

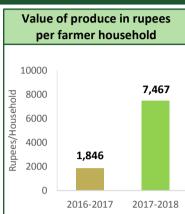

This factsheet presents the block-level findings and other information derived from the study "Area, Yield, Production and Value of Produce under the Special Programme for Promotion of Millets in Tribal Areas of Odisha (Odisha Millets Mission), 2017-18, Phase-1" and baseline (2016-17) reports prepared by Professor Srijit Mishra and team at NCDS.

OUTCOMES: CHANGES AFTER ONE YEAR OF OMM INTERVENTION

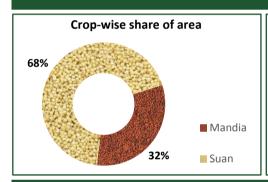

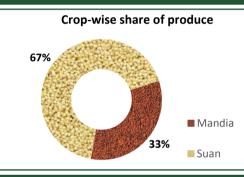

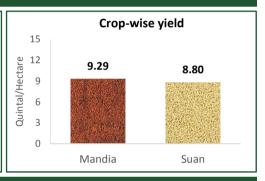

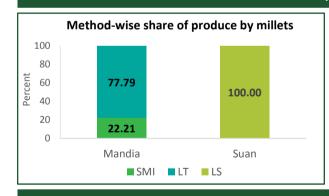

CROP WISE OUTCOME

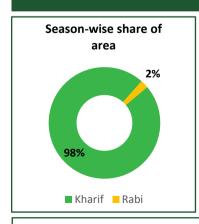

METHOD WISE OUTCOME

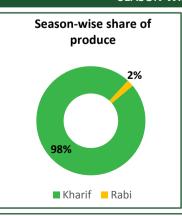

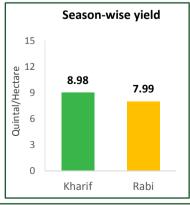

Interventions in agronomic practices under OMM include SMI, LT and LS methods. In year one under OMM, farmer households in Lanjigarh who cultivated mandia adopted SMI and LT methods.

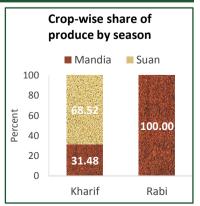

Suan was cultivated by farmer households during kharif and they adopted LS method. Lanjigarh and Narla are the only two blocks where suan was cultivated in year one under OMM.

SEASON WISE OUTCOME

Abbreviations: OMM- Odisha Millets Mission, SMI- System of Millet Intensification, LT- Line Transplantation, LS- Line Sowing
